- Work out of the Box with a SRM Box
- High Reliability and Performance at a Low Cost
- Fast Printing (150mm/sec)
- "Drop-In & Print" Paper Loading
- Swappable Interfaces: Serial, Parallel,
- Optional Vertical Stand

Certified Resto Quebec Printer

Revenu Quebec, the tax authority of Quebec, has certified its "TSP650 Resto Quebec" receipt printers as compatible and certified with the sales recording module (SRM) to be installed in all restaurants in the Canadian province under a new rule that took effect on September 1st, 2010. The TSP650 Resto Quebec comply with the new regulations, eliminating at least one step restaurant operators have to take to comply with the rule.

Implemented to combat tax evasion, the rule stipulates that restaurant operators in Quebec provide all customers with receipts listing each menu item purchased and its price, as well as applicable taxes paid. All receipts must be generated through the Revenu Quebec-selected SRM, in conjunction with a certified SRM-compatible receipt printer and point of sale system. The SRM is the device underlying the technological solution that Revenu Québec has chosen to ensure that taxes collected are remitted to the government.

The TSP650 Resto Quebec is configured to work out of the box with the SRM module making installation very simple to any reseller and restaurant operators.
