

TSP100III Faster, Easier, Better!

Star Micronics presents the new TSP100III, the faster, easier, and better POS solution. Already a leading player in the mPOS market, Star Micronics TSP100III is now offered with WLAN and LAN connectivity, supporting 802.11b/g/n with 2.4GHz, for an easy-to-use and ready-to-go installation. The TSP100III now offers simple connection with a “Push ‘n’ Connect” WPS set-up for WLAN, and an easy Ethernet connection for the LAN version. The new thermal receipt printer is an upgrade of the TSP100, printing at almost twice the speed with a special de-curl function, and is fully compatible with its previous version, requiring no additional integration or development.

With included internal power supply, power cables, complete mounting kits, and paper roll, the TSP100III is the perfect printer for any mPOS bundle. Star has also added an additional USB type A connector for one convenient

power source for your tablet or mobile device. The TSP100III offers a small form factor for any sized counter-space and prints up to twice the speed of its previous generation at 43 receipts per minute. The high-speed, thermal printer also includes a guillotine auto-cutter and “drop-in & print” paper loading for even the busiest of retail and hospitality environments.

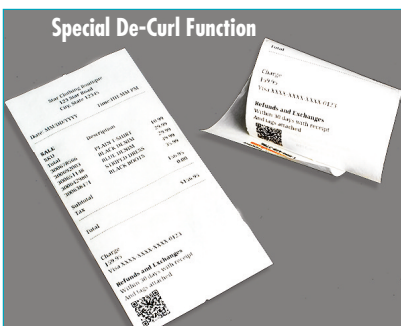

Combined with its powerful futurePRNT Windows software users can enhance their printed receipts to add graphics (logos and coupons), multiple copies, or use the text processing function to replace printed information or trigger a coupon, and much, much more. The TSP100III can also be used with Star Micronics AllReceipts™ digital receipt app, allowing shoppers to manage their receipts digitally, and retailers to receive instant feedback on customer satisfaction.

- All-in-One Box with WLAN or LAN interface
- Available in Ultra White & Gray
- High-Speed Printing at 43 Receipts per Minute (250mm/s)
- Special De-Curl Function & Guillotine Auto-Cutter

- Push ‘n’ Connect WPS easy connection
- “Drop-In & Print” Paper Loading
- AllReceipts™, Digital Receipt Solution Compatible
- USB Type A connector to power tablet and other mobile devices.
