CaptureOne. The smart choice

When it comes to meeting your customers' check imaging needs, CaptureOne is the answer.

CaptureOne features:

- Highest MICR accuracy in its class that virtually eliminates unreadable checks
- Superior image enhancement to ensure clearest image is captured
- High-quality construction with all-metal components
- Industry-leading 2 year warranty lowers total cost of ownership
- Best-in-class reliability offers trouble-free performance
- Easy to use and easy to maintain
- Standard two-pocket support for segregating exceptions
- 100-sheet document feeder helps streamline workflow
- World-class service and support programs
- Backed by Epson, a leading global technology company

CaptureOne means quality

To ensure the quality and reliability you'd expect from Epson, all aspects of product development are completed in house from initial design to manufacturing. CaptureOne is built with all-metal components to minimize maintenance and ensure high performance and it has an MCBF of over 2.47 million documents.

In addition, it was awarded the International Forum (iF) Design Award, based on its outstanding design and functionality.

CaptureOne. Highest MICR accuracy

MICR accuracy is critical in minimizing unreadable checks and check

processing costs. With its MICR accuracy of 99.9%, CaptureOne is the most reliable check scanner available today. Using the Progressive MICR Method and advanced imaging algorithms, CaptureOne virtually eliminates unreadable checks due to misreads and substitution errors.

CaptureOne offers superior image enhancement

Another important factor in accurate check scanning is image quality. When the check image is poor, misreads occur. To minimize check noise, CaptureOne's precision image enhancement algorithm drops unnecessary background imagery to ensure that the clearest possible image is captured.

“Epson's CaptureOne comes out on top with practically no MICR misreads.”

First National Bank of Omaha

CaptureOne equals top throughput

With its industry-leading MICR accuracy and image quality, CaptureOne delivers the fewest MICR misreads and non-conforming images, eliminating manual intervention and lowering processing costs. This means your customers get top scanner performance at the least possible cost.

CaptureOne offers more flexibility

CaptureOne comes with two-pocket support as a standard feature. This gives your customers the flexibility to process exceptions, on-us checks or segregate different types of documents such as checks and payment coupons.

CaptureOne is easy to use and maintain

CaptureOne is full of easy-to-use features. The check scanning process is very simple and tasks like undoing a jam, unlike other scanners, can be done quickly with fast access through side doors. CaptureOne also features advanced self-diagnostics that keep the operator informed of the scanner status and when it is time for maintenance.
