

Epson® Direct-Connect Kitchen Display System (KDS) Controller

The direct-connect KDS controller that reinvents the kitchen printer.

From the leader in kitchen printing, the Epson Direct-Connect KDS Controller reinvents the kitchen printer and offers a reliable solution for quick service restaurants (QSRs) to digitally manage orders without using paper. Easy to install and configure within existing kitchen workflows, it not only offers a robust KDS controller, but also features a durable printer, should you need it — in one space-saving device. You get a simplified infrastructure for greater efficiency and order accuracy. The controller provides a backup receipt or chit printer for uninterrupted service. Plus, it seamlessly connects to your POS system and drives your restaurant's KDS.

Simplified infrastructure — a reliable KDS controller and receipt printer in one device; lower power consumption and more efficient cabling

Up to 50 percent smaller than standalone KDS controllers and receipt printers — saves space in your restaurant

Simple configuration — intuitive Windows®-based configuration utility with simple graphical interface

Easy to use — designed for QSRs; focused feature set for simplified operation

Greater customer satisfaction — built-in printer ensures uninterrupted service; prints kitchen chits in the event of a display malfunction
