

HDMI Capture Card

New standalone HDMI 1.4a compatible input card from Mimo Monitors is a superior solution for **conference rooms, streaming, video recording and more.**

Converts HDMI to standard PC webcam data. Converts video and audio from HDMI to USB Video Class (UVC) and USB Audio Class (UAC) data.

The sleek, compact 41 x 110 x 20 mm design requires **no external power and eliminates visual clutter with no extra cords required.**

Simple to set up and standardized with no proprietary cables or connectors for a seamless experience.

Customize for your application with a **plug-and-play solution**—no driver downloads.

Works with most third-party software and Operating Systems including Windows, Mac OSX, Linux, and Chrome. Fully upgradable firmware.

Supports up to 1920x1080 at 60fps (1080p) and up/down conversion of video without CPU interaction. Uses USB 3.0 for video.

Optional **MJPEG compression for video.**

Audio capture up to 48 KHz PCM. Uses USB 2.0 for audio.

Integrated ISP (Image Signal Processing) engine supports most UVC defined image adjustments; Anti-flicker operation with multiple framerates supported.

The HDMI Capture Card is available now with a **3-year warranty** for only **\$199.99**. Find it on mimomonitors.com
