

CYPRUS

stylish and versatile

CYPRUS offers a stylish and powerful solution for today's demanding applications. It runs Intel's Core™ technology, and allows data to be communicated via its Intel Gigabit network or USB 3.0 ports. Every CYPRUS's screen is protected against liquid spills, and lasts millions of touches.

The CYPRUS's versatile design allows it to be configured to meet your application requirements and budget. It can run as a thin client on a solid state disk (SSD), or support more complex applications under Windows or Linux. With its long shelf life (minimum 5 years), the CYPRUS will lower your total cost of ownership.

The CYPRUS has been successfully installed in the restaurants, retail stores, convenient stores, factories, warehouses, banks, casinos, and hospitals worldwide.

- Intel's Quad Core 2GHz, up to Core i7
- 2GB memory, up to 16GB
- Hard drive, or SSD for storage
- POS 7, Windows 7 / 8.1 / 10, Linux
- Intel Gigabit network (WiFi option)
- 4 Serial and 5 USB ports
