Performance at Exceptional Value

The XT3915 is a fan-free, spill-resistant resistive 15" touch screen with a 128GB solid state drive (SSD) as its standard configuration. The SSD eliminates the traditional hard drive as a mechanical point of failure for maximum uptime and reliability.

Its base is fully adjustable and conveniently folds and configures to an optimal angle. By folding flat, the XT3915 saves up to 40% shipping costs.

XT3915 features an Intel® Celeron™ J1900 / 2.0GHz, 2GB standard DDR3L RAM (8 GB maximum) and a 15" resistive touch TFT LCD touch screen. Along with a rich array of connectivity features are options for a mini-PCIe slot for WiFi, powered USB, 8 port hub, second hard drive, backup battery and VESA wall mount bracket.

The XT3915 also comes in a projected capacitive touch screen version, the XT3815.
