

Touch Screen for Children

Computer access at the Touch of a finger

*Easily mounts on ANY monitor
Use with ANY program*

**Touch screens makes computer
learning
both FUN and EASY.**

Touch Screens help young children
handicapped and exceptional
children to start learning to use a computer.

Allows DIRECT interaction with screen
images for instant feedback. A mouse is
more difficult to use because it is distant
from the screen, and requires advanced
eye-hand coordination. A touch screen is easy.

Patented external add-on touch screen
kit is the perfect solution for business,
home, office, school, Point-of-Sale, and
government where a user-friendly input
device is needed.

External Kit for 14", 15", 17", 19", & 21" Sizes
avail.
