

Epson® Multi-Station Kitchen Display System (KDS) Controller

An easy multi-station KDS controller that reinvents the kitchen printer.

Designed for growth, the Epson Multi-Station KDS Controller reinvents the kitchen printer so quick service restaurants (QSRs) can digitally manage orders and expand as needed. Easy to install and configure within existing workflows, this simplified infrastructure not only offers a reliable controller, but also a durable printer — in one space-saving device. Add up to nine stations with convenient expansion modules. From the leader in kitchen printing, this controller offers greater efficiency, accuracy and redundancy for uninterrupted service, automatically rerouting orders if one station goes down, and providing a backup printer. Plus, seamlessly connects to POS systems and drives the KDS.

The reliable KDS controller that grows with your business — add up to nine stations via KDS expansion modules connected to the KDS controller network

Simplified infrastructure — a reliable controller and printer in one device; lower power consumption and more efficient cabling

Simple configuration — intuitive Windows®-based configuration utility with simple graphical interface

Easy to use — designed for QSRs; focused feature set for simplified operation

Greater customer satisfaction — ensures uninterrupted service; automatically reroutes orders to other stations if a display malfunctions; also features built-in receipt printer
