Thin, Small & Light - Great for one-handed solutions

The Socket Mobile S860 is a fast-scanning 2D imager barcode scanner and passport reader with Bluetooth® wireless technology. The scanner virtually captures any 1D or 2D barcodes in milliseconds. Small, thin and easy to use, the scanner is optimized for attaching to mobile devices, enabling one-handed operation. Merchants can scan barcodes of products and the passports of consumers with one device. Scanning barcodes printed on labels or displayed on device screens, it reads all the most popular 2D barcodes and MRZ/passports, perfect for the travel industry retail point of sale, inventory management, sales order entry, field service, and other mobile business applications. Approximately the same size as a credit card, measuring less than ½ inch (1.27cm) thick and weighing less than two ounces, the S860 is one of the smallest and lightest barcode scanners and passport readers available in the market today. The S860 slips neatly into your pocket and fits comfortably in the palm of your hand when attached to a smartphone.
