

# Hand sanitizer holder

## SafeGuarding customers and staff

### APPLICATIONS

- Safeguarding customers in a variety of retail environments
- High footfall checkout lanes
- Hygiene-sensitive work environments for staff
- Busy public spaces where sanitization is important

### BENEFITS

- Enhanced hygiene at a time of heightened sensitivity
- Increased customer confidence in the duty of care offered by the retailer
- Modular design provides minimal installation overhead
- Consistent with existing SpacePole modularity, ergonomics and build-quality
- Compatible with most sanitizer containers with a footprint no wider than 80mm
- Marginal disruption to retail operations and an enhanced customer experience
- Adds value without compromising functionality of your existing POS
- Enhances store loyalty through customer care

The current Corona virus situation has challenged retailers to re-evaluate the safety and productivity of their commercial environments for the immediate and near-term scenarios that isolation and social distancing has presented. Habits of personal hygiene have been highlighted to minimize the effect and distribution of the virus and the wellbeing of customers is an acute focus for retailers wishing to retain and develop the loyalty of customers.

To support this objective, Ergonomic Solutions, creators of the SpacePole range of mounting solutions, are further expanding their portfolio of products to respond to the current COVID-19 epidemic with a hand sanitizer mount.

Available to connect to an existing SpacePole payment plate or as an addition to a larger SpacePole mounting solution, this easily installed dispenser holder provides your customers with a quick and convenient opportunity to sanitize their hands before and after completing their payment transaction.

Without infringing on the packing or payment areas, this easily accessible module is installed in minutes and complements the SpacePole SafeGuard<sup>®</sup> Screen and extended payment swing arm to provide additional protection for customers, minimise the impact on POS transaction time and enhance your customer care reputation.

SpacePole's hand sanitizer dispenser holder is designed to be mounted on a swing arm or top mounted on a floor stand. It can be even be wall mounted.

### SAFEGUARD HAND SANITISER HOLDER
