

Touch Screen for Children

Computer access at the Touch of a finger

Touch Screens help

young children,
handicapped and
exceptional children learn
to use computers

Allows DIRECT interaction
with screen images
for instant feedback.

Works with all programs

Faster than a mouse
Pressure Sensitive Technology
Scratch resistant, durable

*Easily mounts on ANY monitor
Use with ANY program*

The *TouchWindow*® Add-On touch screen allows early learners to use a computer successfully right from their first experience. Students and teachers naturally point to and touch computer monitors while using software. The *TouchWindow*® takes advantage of this natural interaction by allowing students to select and move objects, operate pull-down menus, and draw graphics - all with the touch of a finger.

- **Proven Success**

Touch Screens are especially effective with first time computer users, early learners, and students with developmental and/or physical disabilities. Studies show that students learn faster with better retention when they are engaged in the process. Touch Screens are easy for all students to use, and keeps them actively involved in learning.

- **Direct Selection**

Users make selections directly on the screen -- no intermediate steps or devices interfere with their attention. Just touch an on-screen object or word, and the computer responds.

- **Essential Safety**

TouchWindow is amazingly resistant to breakage. Its unique, scratch-resistant surface offers the ultimate in safety for all users.

- **Versatile and Functional**

The *TouchWindow* is easy to attach or remove to use on another computer. It can also be used as a switch by setting it flat on a table or wheelchair tray. Most Macintosh and Windows software that works with a mouse is *TouchWindow* compatible.

- **Quality Materials and Warranty Included**

Every *TouchWindow* screen is backed by a full one-year warranty and includes an instruction manual, plastic stylus, mounting rails and buttons, and an installation guide.

Fits 15", 17", 19", and 21" size monitors
